

Developer 1

MVP

User Authentication & Account Management

- Authentication Service
 - Email/password authentication
 - JWT access/refresh token management
 - Role-based access control
- User Profile Management
 - Personal information management
 - Language preferences
 - Address management
 - Notification preferences

Research:

- JWT authentication
 - Session handling
 - RBAC systems
-

Consumer Marketplace

- Deal Discovery Engine
- Product Listing Module
- Search Service

Research:

- Search indexing
 - Geolocation filtering
 - Ranking algorithms
-

AI Product Recognition

- Image Processing Pipeline
- Product Classification
- Validation Layer

Research:

- OCR
 - Computer Vision
 - Image classification
-

Delivery Management

- Delivery Assignment Service
- Delivery Tracking

Research:

- Matching algorithms
 - GPS tracking
 - Real-time updates
-

Trust & Safety

- Food Verification
- Store Reputation System

Research:

- Reputation systems
 - Trust scoring
 - Review management
-

V2

Personalized Recommendation Engine

- Recommendation Service
- Personalized Feed

Research:

- Collaborative filtering
 - User behavior analysis
-

Customer Support Platform

- Ticket Management
- Dispute Resolution

Research:

- Ticket lifecycle
 - Escalation systems
-

V3

Predictive Demand Forecasting

- Demand Prediction Models
- Inventory Risk Detection

Research:

- Time series forecasting
 - ML prediction models
-

Compliance & Governance

- Food Safety Compliance
- Audit & Monitoring

Research:

- Audit logs
 - Governance systems
-

Developer 2

MVP

Business Portal

- Business Registration & Verification

- Inventory Publishing
- Listing Management

Research:

- Inventory systems
 - Business onboarding
-

Dynamic Pricing Engine

- Rule-Based Pricing
- Automated Price Updates

Research:

- Pricing engines
 - Scheduling systems
-

Ordering System

- Cart Management
- Checkout Flow
- Order Lifecycle

Research:

- Transaction workflows
 - Order state machines
-

Administration Portal

- User management
- Listing moderation
- Analytics dashboard

Research:

- Dashboard systems
 - Moderation tools
-

V2

Reservation & Availability Management

- Inventory Reservation System

Research:

- Locking mechanisms
 - Concurrency handling
-

Smart Notification System

- Event-driven notifications
- Push & email notifications

Research:

- Message queues
 - Notification services
-

Charity Integration Platform

- NGO Management
- Donation Marketplace
- Impact Reporting

Research:

- Donation workflows
 - Allocation systems
-

Business Analytics Suite

- Revenue Recovery Dashboard
- Listing Performance Metrics

Research:

- KPI analytics
- Data aggregation

V3

AI-Driven Discount Optimization

- Dynamic Pricing Models
- Pricing Simulations

Research:

- Optimization algorithms
 - Revenue prediction
-

Automated Inventory Monitoring

- Inventory Monitoring Agent
- Business Recommendations

Research:

- Rule engines
 - Event-based monitoring
-

Advanced Business Intelligence

- Forecasting Dashboard
- Operational Insights

Research:

- BI architecture
- Reporting pipelines

This way both developers get:

- User-facing features
- Backend systems
- AI features
- Analytics features
